**Approval of  
Minutes**

Minutes from the June 21 meeting were approved.

**DS3/VIC  
Upgrade**

Bob Kostrubanic reported that the DS3 is now running in "test mode," with a change to full production planned for the weekend. Traffic is being routed automatically to Internet 2 when possible.

**Banner System  
Implementation**

Mark Franke distributed a summary of the dates for implementation of various parts of the Banner system. He also described the training plan that is being implemented and believes that good progress is being made toward implementation.

**Corel License  
Extension**

Bob Kostrubanic reported that no progress has been made on extending the Corel license. IU does not appear to be interested. Purdue is still pursuing a site license.

**Other Items**

Problems with WebCT this fall were described as having a serious impact on fall classes. Plans for changing the installation (to eliminate load balancing) are expected to resolve most of the problem.

Bob Kostrubanic reported that the new "salvage policy" will involve keeping machines for one month. Non-profit organizations will have the opportunity to take machines from the holding area, and then the remainder will be sent to a salvage company.

Bob Kostrubanic distributed copies of several IT Services procedures for requesting services. The intent is to improve tracking of the various kinds of requests. The process for student access lab software installation will be changed so that ACITAS has an advisory role and ITPC makes decisions as needed.

Bob Kostrubanic also reported that the department's disaster recovery plan is being reviewed for adequacy.
