

PI Math Club
And Pi Mu Epsilon
are pleased to present

a DVD recording of

The Music of the Primes - Part 3

PRIME NUMBERS			
2	3	5	7
11	13	17	19
23	29	31	37
41	43	47	53
59	61	67	71
73	79	83	89
97			

We will be showing the third part of The Music of the Primes by Dr. Marcus du Sautoy holder of the Charles Symonyi Chair in the Public Understanding of Science at Oxford University. He discusses how advances in computer technology and insights into how atoms behave make proving the Riemann hypothesis seem tantalizing close, but still elusive. You can enjoy this even if you didn't see parts 1 and 2.

Wednesday, February 29 starting at noon in KT 216

Pizza and soft drinks will be provided to those
in attendance.

Open to all interested students.
