

Dean's Message

Welcome to the College of Engineering, Technology, and Computer Science (ETCS). Building on Purdue's legacy as a premier institution for engineering and technical education, ETCS is launching an ambitious strategic plan, [ETCS 2030](#). This comprehensive roadmap outlines our aspirations, future endeavors, and the path to achieving them. As Dean of ETCS, I am honored to share this vision with our campus community.

ETCS 2030 embodies our unwavering commitment to:

- Nurturing student success
- Fostering community engagement
- Advancing diversity, equity, inclusion, and empowerment
- Achieving national recognition

We support our students from inspiration to realization. Through extensive outreach programs, we engage with future students early on, inspiring them to pursue careers in engineering, technology, computer science, and organizational leadership. Once they join ETCS, we provide exceptional learning experiences, hands-on training, cocurricular activities, and mentorship to ensure their success and career readiness. We help our students launch successful careers seek more and continue to assist them throughout their professional journeys.

ETCS is deeply committed to our community. We partner with local organizations to offer unique learning opportunities that bridge the gap between theory and practice. Our community partners also bring authentic challenges to the classroom, fostering transformative learning experiences.

We will continue to invest in our students, faculty and staff, providing them with the resources and support they need to excel. We are committed to creating a culture of inclusivity and respect where everyone feels valued and empowered.

By focusing on these strategic areas, we will expand our reach, elevate the quality of our outcomes, strengthen our positive impact on society, and earn the deserved national recognition. I invite you to join us on this exciting journey as we work together to build a brighter future for our students, faculty, staff, and communities.

Sincerely,
